DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 41, 43-44, 47-48, and 56-58 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yasukawa et al (US Pat 5,629,186) in view of Arnold (US Pat 4,560,504) for the reasons of record in the previous office action.

In response to this rejection, Applicants argue that neither Arnold nor Yasukawa alone nor in combination teach a porous material having mean pore diameters greater than about 10 microns and a density equal to or greater than about 6 pound per cubic foot.

Applicant's arguments have been considered but are not convincing. Yasukawa teaches a matrix having a density between 3.5 to 5.5 pounds per cubic foot. Instant claim 41 requires the claimed device have a density "equal to or greater than about 6 pounds per cubic foot". The phrase "than about 6 pounds per cubic foot", given its broadest interpretation, encompasses the 5.5 pounds per cubic foot taught by Yasukawa. The fibers in the matrix of Yasukawa can have a mean diameter as large as 20 microns, which suggests a pore diameter between the fibers of about 10 microns.

Also, while claim 41 has been amended to delete the term “antibodies”, claim 41 still recites proteins and receptors which broadly encompass antibodies.

3. Claims 41, 43-44, 46-48, and 56-58 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lyles et al (WO 96/24631) in view of Arnold (US Pat 4,560,503) for the reasons of record in the previous office action.

In response to this rejection, Applicants indicate that the claims have been amended to delete the term “antibodies” and thus submits that neither Lyles nor Arnold alone or in combination teach all of the limitations of the amended claims.

Applicant’s amendment has been considered but is not sufficient to overcome this rejection. The instant claims, specifically claim 41, still recite proteins and receptors, which broadly encompasses antibodies.

Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
